

Eye Spy

You are being asked to choose an eye and draw it on a 12"X18" piece of paper. The objective of this assignment is to draw it in the correct proportion but also filling the entire page with the eye. First you must draw your eye lightly with pencil. Make sure that your eye has the correct shape and known features (eye lids, pupil, iris, wrinkles, eye lashes and eye brow.) You will then make it look realistic by using oil pastels. It is very important that you use gradual value change, directional textures, and accurate lighting effects in order for this to look realistic.

Draw a line to match word to definition:

- | | |
|-------------------|--|
| Space | Art that corresponds to actual life |
| Value | To mix inseparably together |
| Texture | A painting and drawing medium |
| Oil Pastel | Visual or tactile qualities of a surface |
| Blending | The relative lightness or darkness of a color |
| Realism | An area used for design |

In section one please grade yourself from 1-10 in the following categories.

	1	2
The eye takes the space of the page		
The eye is in accurate proportion		
Color in design is accurate and well done		
Pastel technique incorporates blending and value change		
The anatomy of the eye is evident and accurate		
Overall craftsmanship		
Time on task and cleaning participation		
TOTAL		170

On the back of this page please write four sentences about what you learned and how you improved as an artist. If there was one thing that you would do differently what would it be?
